Experience

מטה החמ"ל הארצי - System 811

Volunteer Product & UX/UI Designer
2025—Present • Volunteer

- Designing end-to-end UX/UI for System 811, a logistics coordination platform for routine and emergency operations.
- Creating user flows, interface screens and operational dashboards for managing requests, suppliers, volunteers, shortages and assignments.
- Working directly with developers to define requirements, system behavior and implementation needs.
- Translating real operational workflows into clear product and interaction solutions.
- Designed the organization's website, including information architecture, user flow, page layouts, visual design and image editing.

Selected Project

NUMI

2D Narrative Puzzle-Platformer • Unity
Game Design • Level Design • Game UX/UI

- Designed and developed a narrative puzzle-platformer built around five playable memories, including gameplay systems, level design, player feedback and visual direction.
- Implemented the experience in Unity and refined the gameplay through player testing and iteration.
- Selected for upcoming commercial distribution through the Israeli Library subscription platform
